DVD Library Project
MVC Pair Project

Requirements:

You will create an MVC site using a sql database backend that allows you to track information about a DVD collection.

1. Allow the user to add a DVD to the collection
2. Allow the user to remove a DVD from the collection
3. Allow the user to list the DVDs in the collection
4. Allow the user to display the information for a particular DVD
5. Allow the user to search for a DVD by title
6. Allow the user to track when a DVD is loaned (to whom, when, and when returned).

Information to track:

- Title
- Release Date
- MPAA Rating
- Directors name
- Studio
- User rating
- User Notes
- Actors in Movie
- Borrower information
  - Borrower
  - Date Borrowed
  - Date Returned

Extra Challenge:

Add the ability for the user to put more than one note on each DVD entry.
Add the ability to add borrower notes/ratings that can be viewed on the DVD details page.
